

SONGWON introduces first RSPO-certified product – SONGNOX® 1076 antioxidant

Ulsan, South Korea – July 14, 2026 – Songwon Industrial Co., Ltd., a global leader in specialty chemicals and one of the world's largest manufacturers of polymer stabilizers, is pleased to announce that it has received a Certificate (MB Grade) from the Roundtable on Sustainable Palm Oil (RSPO) for its SONGNOX® 1076 phenolic antioxidant.

Issued in January 2026, the RSPO authorization document enables SONGWON to offer SONGNOX® 1076 antioxidant as an RSPO-certified product option to customers. Trial quantities are expected from April 2026, with a market launch planned for the second half of the year. Looking ahead, SONGWON sees potential to expand its portfolio with additional RSPO-compliant products.

With the launch of its first product meeting RSPO requirements, SONGWON positions itself as an early mover in providing RSPO solutions for the polymer additives market. SONGNOX® 1076 already features one of the lowest carbon footprints in its class and the availability of this RSPO-certified option represents an important further step toward more sustainable sourcing. For customers, it represents a tangible contribution to avoiding deforestation, progress toward more sustainable sourcing and helps to meet upcoming regulatory requirements, including future EU deforestation regulations.

“We are proud to provide a product that helps customers meet evolving sustainability and regulatory expectations without compromising performance,” said Hyeokkoo Lee, Global Product Manager Main Antioxidants. “Our focus is on converting responsible sourcing commitments into practical actions that generate strong performance and measurable impact.”

RSPO is a globally recognized, multi-stakeholder organization that promotes the growth and use of sustainable palm oil by developing and implementing credible global standards. This initiative forms part of SONGWON's broader commitment to responsible sourcing and sustainable product development. By aligning its offerings with internationally recognized frameworks such as RSPO, SONGWON continues to support transparency, environmental protection and long-term value creation across the chemical value chain.
