

SONGWON demonstrates industry commitment at Chinaplas 2023 with its newest high-performance solutions

Ulsan, South Korea – April 17, 2023 – Songwon Industrial Co., Ltd., the 2nd largest manufacturer of polymer stabilizers in the world and a key global specialty chemicals player, is showcasing the newest additions to its broad portfolio of high-performance solutions at Chinaplas 2023 in Shenzhen, China from April 17th – April 20th.

As a reliable, innovative partner with over 57 years of industry experience and manufacturing expertise, SONGWON's success over the years has come from listening closely to and transforming customers' needs into high-performance products. SONGWON's proprietary technology and backward integration make it possible for the company to continue to deliver the high quality, consistency and security of supply that customers have come to expect.

With its comprehensive portfolio of antioxidants and UV stabilizers offered in a full range of physical product forms, SONGWON is perfectly positioned to effectively serve the specific needs of Chinese customers. For SONGWON, Chinaplas 2023 offers an ideal opportunity and an excellent platform to highlight its strengths and strong, ongoing commitment to the plastics industry in China.

In addition to its broad range of products, SONGWON is presenting its latest innovations: SONGNOX® 9228 antioxidant and SONGSORB® 1164 UV absorber at the fair. Suitable for packaging, agriculture, building & construction, SONGNOX® 9228 antioxidant and SONGSORB® 1164 UV absorber are also ideal for use in home & personal care applications.

By making more severe polyolefin processing possible, especially at high temperatures, due to its excellent hydrolytic stability, SONGNOX® 9228 antioxidant overcomes the challenges traditional high-performance phosphites/phosphonites face. Moreover, it also delivers excellent color protection for Cr-type high-density polyethylene (HDPE), polypropylene (PP) and engineering resins.

The triazine, SONGSORB® 1164, is the latest addition to SONGWON's UV absorber range and protects plastics against UV light degradation. It was specially developed to be suitable for use with polyolefins that come into contact with food. In comparison to conventional benzotriazole UV absorbers, SONGSORB® 1164 enables manufacturers to achieve a longer service life for polyolefins and engineering plastics exposed to outdoor weathering.

To learn more about what these new products have to offer or to get more information on SONGWON's complete portfolio, visit SONGWON's experts in Hall 15, Stand G39 at Chinaplas 2023 or contact: techservice@songwon.com.

About Songwon Industrial Co., Ltd.

A leader in the development, production and supply of specialty chemicals, SONGWON's products touch your life every day, everywhere. Since 1965, we've been driving innovation, partnering for progress and paving the way for a better more sustainable tomorrow with 360° customized solutions.

Headquartered in South Korea, SONGWON is the 2nd largest manufacturer of polymer stabilizers worldwide. With Group companies and world-class manufacturing facilities across the globe, we are dedicated to providing customers in over 60 countries with high-performance products that meet their individual needs and the best levels of service.
