

SONGXTEND® 1301
For expanded and
extruded polystyrene
containing polymeric
flame retardants

SONGWON is a leading specialist in
the stabilization of polystyrene foams.

Expanded (EPS) and extruded (XPS, XEPS) polystyrene that contains polymeric flame retardants requires special stabilization to safeguard the polymeric flame retardant and prevent discoloration during processing.

Thanks to its excellent physical and technical attributes, new SONGXTEND® 1301 provides the required protection, thereby improving the performance of the end-product.

It's all about **the chemistry™**

 **SONGWON**

Converters benefit from SONGWON's long-standing expertise in stabilization

Wide range of polymer stabilizers

High processing stability thanks to effective protection of molecular weight during melt conversion

Minimal discoloration during melt conversion

EHS and REACH standards met

Comprehensive technical expertise

Testing laboratory in South Korea

Technically advanced, customized stabilizer formulations

Dedicated local support centers

Proven reliability

More than 50 years' manufacturing experience in South Korea

Backward integration of key raw materials

Global sales organization and distribution channels in Asia, Europe, and North America

Strong commitment

Continuous innovation to meet new industry standards

SONGXTEND® 1301 is suitable for use in the manufacture of masterbatches that contain polymeric flame retardants, generating significant value for manufacturers and increasing the safety of end products.

SONGXTEND® 1301

- ☞ Satisfactorily supports replacement of hexabromocyclododecane (HBCD), which is now banned in many countries.
- ☞ Maintains the molecular weight and color of EPS and XPS/XEPS compounds and masterbatches containing polymeric flame retardants.
- ☞ Provides a broader processing window than current state of the art stabilizers.
- ☞ Is effective in low amounts.

40% polymeric flame retardant masterbatch

Oven aging at 210°C; SONGXTEND® 1301 performs better than competition sample

Storage conditions

SONGXTEND® 1301 is supplied in dust-free granular form (GR). It is packed in 20-kg aluminum liner bags or 500-kg big bags with aluminum liners, which, once open, should be resealed to protect the contents.

The product should be stored in a cool and dark place.

SONGXTEND® 1301 is stable for 12 months, provided it is stored under the conditions described above.
