

ENVIRONMENTAL POLICY

SONGWON Vision

To be a global leader in the specialty chemicals industry with a solid and sustainable growth, creating value for all our stakeholders.

SONGWON Mission

To be the supplier of choice by providing our customers with best-in-class service, a high quality, competitive and innovative range of products as well as customized solutions.

It is our duty to observe governance and act in accordance with environmental and social responsibility.

SONGWON Environmental Policy

SONGWON makes every effort to meet the requirements of stakeholders with its environmental management system.

Environmental impact assessments are carried out from the research and development stage to minimize the environmental impact, comply with domestic and foreign environmental regulations as well as other requirements for environmental preservation and the use of resources and clean technology.

With our Environmental Policy, we are committed to:

| |
|--|
| Zero environmental pollution accidents |
| Compliance with environmental laws and regulations |
| Energy efficiency through the management of greenhouse gas emissions |
| Reduction of air and water pollutants generated by implementing continuous process improvements |
| Waste generation reduction via process monitoring and a reduction culture |
| Recycling rate increases through the recovery of raw materials, subsidiary materials and a waste heat recovery process |
