SONGWON’s history

Founded in 1965, SONGWON is headquartered in Ulsan, South Korea and operates group companies all over the world.

Since it launched its first product, a PVC stabilizer, more than 50 years ago, SONGWON – formerly the only plastic additives manufacturer in Korea – has grown to become the second largest producer of polymer stabilizers worldwide and a key player in their specialty chemicals business.

Today, SONGWON offers the combined benefits of a global framework and readily accessible local organizations.

It’s all about the chemistry™
