SONGWON’s PP stabilization technology expertise enhances the sustainability of automotive recycling applications.

Developed with sustainability in mind and to ensure the quality of recycled plastics is maintained, SONGXTEND® 2721 improves long-term heat stability (LTTS) thanks to its excellent physical and technical properties.
Automotive manufacturers benefit from SONGWON’s vast industry experience and sustainable production expertise.

SONGXTEND® 2721 provides:

**Sustainable flexibility**
- Enables recycled-PP to be re-used in durable applications
- Concentration levels can be adjusted to meet the long-term heat stability (LTTS) requirements of applications (e.g. engine room covers, cable ducts, battery housing etc.)

**Extends performance**
- Increases quality & upgrades recycled-PP performance
- Enhances sustainability by extending the service life of recycled-PP

SONGWON offers:

**Proven reliability**
- Produced with the highest quality backed by SONGWON’s 50 years of manufacturing experience
- Proprietary technology & backward integrated in key raw materials guarantees consistent supply
- SONGWON’s global sales organization & dedicated local support are ready to help customers wherever & whenever they require

SONGXTEND® 2721 enhancing top-up stabilization system for PP recycled resins was especially designed for automotive interior and under-the-hood automotive parts.

SONGXTEND® 2721 retains the quality level while re-stabilizing recycled-PP, improves LTTS performance and extends the service life to a possible 3 to 4 factor depending on the recycle stream’s quality.
SONGXTEND® 2721 – a sustainable solution for automotive recycling applications

SONGXTEND® 2721 minimizes the negative effect of acid residues from battery case recycling streams. SONGWON provides manufacturers expert support in selecting the right stabilization system independent of the recycled-PP’s source or quality.

Enhanced durability of recycled-PP

- Reprocessed PP + 1.2% SONGXTEND® 2721 (as a top-up during recycling)
- Reprocessed PP

Storage conditions

SONGXTEND® 2721 is supplied in granule (GR) form and should be stored in closed containers, in a dry area indoors out of direct sunlight, at temperatures of 5°C – 40°C.

Shelf life

Provided SONGXTEND® 2721 is stored as indicated, it will remain stable for 12 months.
SONGWON provides customers with warranties and representations as to the chemical or technical specifications, compositions and/or the suitability for use for any particular purpose exclusively in individual written agreements.
